Business Needs. Technology Solutions.

IT Consulting & Project Management Services

Comprehensive Solutions for Seamless
IT Operations and Strategic Project Success

Managing your IT infrastructure is not just about completing tasks; it is about orchestrating the success of your business. In today's fast-paced environment, quickly adapting to changes inside and outside your organization is crucial. This adaptability improves efficiency, reduces costs, and enhances employee morale, keeping you ahead of the competition. You need a partner with extensive experience managing diverse IT projects to achieve these goals. Systems Integration Inc. (SII) is that partner. With a proven IT consulting and project services track record, SII brings over 30 years of knowledge and expertise to ensure your projects are executed flawlessly, driving your business toward success.

Our Services:

IT Strategy & Planning: Full-service IT planning, procurement, implementation, and ongoing support to drive business growth.

Disaster Recovery Planning: Develop plans to recover from network disruptions quickly, ensuring business continuity.

IT Asset Management: Locate, manage, and report on IT assets, warranties, and lifespans and provide accurate reporting to finance teams.

Network Infrastructure Projects: Comprehensive support for network projects from planning and assessment, hardware and software selection, to network design, including network availability, scalability, disaster recovery, bandwidth efficiency implementation, and deployment.

Server and Storage Upgrades: Implement full and remote server backup for continuous data access during disruptions, disk cloning, data migration, and file and program movement to new computers.

Communication and Collaboration Upgrades: Integrate applications like Microsoft Teams, Outlook, Google Meet, Zoom, Slack, phone systems, and CRMS for seamless communication and access by employees.

Legacy System to Cloud Migration: Design and implement roadmaps for hybrid or full cloud environments.

Data Center Migration: Relocate assets between physical, virtual, or cloud environments.

- **End User Migration:** Transition employees from traditional desktop applications to cloud-based applications and virtual desktops, such as Microsoft 365, and computer upgrades.
- **Remote Work Solutions:** Configure hardware and software for secure and efficient remote work.
- **Hardware & Software Procurement:** Leverage buying power to provide competitive prices on essential products.
- **Cloud-based VoIP:** Customize and implement phone systems to meet organizational needs, from creating "mini-RFPs" to soliciting qualified bids through implementation and post-implementation support.
- **Virtualization:** Maximize server investments with solutions from Microsoft and VMware.
- **Managed Print Services:** Monitor and manage printing needs, including toner replenishment and equipment maintenance.

Why Choose SII?

- **Experience and Expertise:** Decades of experience in managing diverse IT projects.
- **Strategic Partnership:** Collaborate to stay competitive and navigate technology changes.
- **Comprehensive Solutions:** From IT assessments to compliance audits, we ensure your infrastructure meets business needs.

Who Can Benefit from Our IT Security Solutions?

Our team of IT experts can support businesses of all sizes, from Small to Medium (SMBs) to large enterprises across multiple industries, including healthcare, manufacturing, legal, financial and accounting, engineering, architecture, and more. We understand that each industry has unique IT challenges, and we are equipped to tailor our services to meet your needs. Regardless of your IT service needs, SII is unwaveringly committed to providing secure, scalable, and strategic solutions.
