Comprehensive IT Managed Services

Maximize Your Business Efficiency
with Expert IT Management

As southern New England's leading provider of innovative IT solutions and managed services for small-to-medium businesses, we utilize our extensive expertise to address any IT challenge. Our top priority is to deliver exceptional service by partnering strategically with our clients, integrating seamlessly with their IT teams, and working closely with senior management to align with their business and financial objectives.

By partnering with SII, you can expect comprehensive solutions provided by a highly trained team of IT experts focused on solving your network issues cost effectively.

We Offer a Comprehensive Suite of Managed Services Including but not limited to:

Application Implementation & Management:

- Smooth deployment, integration with existing systems, continuous performance monitoring and maintenance, and compliance with regulatory requirements.

Full Security Stack Implementation & Support:

- Total network, endpoint, application, and data security
- Identity, access, security, and event management
- Compliance and risk management
- Incident response and recovery

Cloud migration and management:

- Development of a customized migration strategy, including identification of potential risks
- Support for hybrid environments
- Implementation of robust security measures to protect data during and after migration and meet regulatory compliance
- Continuous optimization of cloud resources for cost and operational efficiency

Network Connectivity

- 24/7 monitoring and support to quickly identify and resolve any network issues
- Firewall, intrusion detection, and security audits
- Proactive maintenance, including hardware repairs, software updates, and performance optimization.

Email and collaboration implementation

- Scalable to accommodate a growing number of users and the need for collaboration
- Encryption, multi-factor authentication, and regular security audits to protect sensitive information
- Migration services to move existing email systems to new platforms
- Ensure compliance with industry regulations through data retention policies and audit trails.

Remote Workplace Management

- Monitor and manage networks and endpoints to ensure optimal performance and protect all devices from security threats.
- Continuous technical support to ensure remote workers face minimal disruption in the event of an issue.
- Automatic deployment of software updates and security patches to all remote devices.
- Data backup and recovery.

Phone system management

- Implementation of VoIP systems
- Continuous support to address any issues that might arise quickly

Data Management

- Robust backup to ensure rapid restoration in the event of data loss or corruption.
- Advanced security measures including encryption, access controls, and security audits.
- Compliance with industry regulations and standards, such as HIPAA, FINRA, etc.

Backup and Disaster Recovery

- Regular automated backups to ensure data is consistently protected.
- Centralized management for all backup and recovery operations.
- Disaster recovery plan developed to ensure business continuity in the event of data loss.

Who Can Benefit from Our IT Security Solutions?

Our team of IT experts can support businesses of all sizes from Small to Medium (SMBs) to large enterprise across multiple industries including healthcare, manufacturing, legal, financial and accounting, engineering, architectural, and more.
